Subject: RE: NSPS OOOOa Clarification

The rule is in effect and sources should be in compliance with the applicable requirements.

Please refer to the EPA Penalty Policy and most recent penalty inflation adjustment:
<https://www.epa.gov/enforcement/clean-air-act-stationary-source-civil-penalty-policy-october-25-1991>
<https://www.epa.gov/enforcement/transmittal-2017-annual-civil-monetary-penalty-inflation-adjustment-rule>

Sources should work with their delegated authority (state or region) regarding specific questions about a particular sources' ability to comply.

Subject: NSPS OOOOa Clarification

Hello Ms. Mia,

With the uncertainty surrounding NSPS OOOOa regulation, we have noticed many oil and gas companies are opting to not report the annual OOOOa report by October 31, 2017.

Can you please clarify what the potential penalty for not reporting is?

Thanks,

Ethan McMahon | Environmental Engineer
